

NATHAN T. HATCH

<https://nhatch.github.io> ■ Seattle, WA, USA ■ nhatch2@uw.edu ■ +1 970-297-8081

EDUCATION

University of Washington, Seattle January 2020 - September 2021
M.S. in Computer Science & Engineering; Advisor: Dr. Byron Boots

Georgia Institute of Technology August 2017 - December 2019
Ph.D. student in Machine Learning; Advisor: Dr. Byron Boots

University of Chicago September 2010 - June 2014
B.S. in Mathematics with honors
B.S. in Computer Science with honors

PUBLICATIONS

N. Hatch and B. Boots. “The Value of Planning for Infinite-Horizon Model Predictive Control.” *Proceedings of the 2021 International Conference on Robotics and Automation (ICRA 2021)*. <https://arxiv.org/abs/2106.00000>

A. Shaban, C. Cheng, **N. Hatch**, and B. Boots. “Truncated Back-Propagation for Bilevel Optimization.” *Proceedings of the 22nd International Conference on Artificial Intelligence and Statistics (AISTATS 2019)*. <http://proceedings.mlr.press/v89/shaban19a.html>.

N. Hatch. “Group Theory: An Introduction and an Application.” *University of Chicago VIGRE REU*; 2011. <http://www.math.uchicago.edu/~may/VIGRE/VIGRE2011/REUPapers/Hatch.pdf>.

UNPUBLISHED RESEARCH PROJECTS

High-speed off-road autonomous navigation June 2019 - present

- Conduct weekly field experiments with a Clearpath Warthog robot (a.k.a. Argo J5 XTR) outfitted with cameras and an Ouster OS2 LIDAR sensor
- Test and improve our custom perception, planning, and control stack
- Handle physical and electrical hardware integration for new sensors
- Coordinate tasks for a team of four PIs and half a dozen graduate and undergraduate students
- Conduct biweekly progress update meetings with the Army Research Lab
- Repaired a leaky grease seal with remote support from the manufacturer
- Adapted model-predictive path-integral control to a goal-seeking navigation and mapping stack
- Sped up the LIDAR processing pipeline to 10Hz to support 3m/s vehicle velocities
- Soldered header pins to the motor control circuit board to collect serial debug output

Curriculum-based learning for bipedal locomotion over rough terrain May 2018 - May 2019

- Extensively studied prior work in locomotion and summarized it in a two-hour lab presentation
- Invented an algorithm to learn a real-time, dynamic bipedal locomotion controller
- Tested the algorithm on challenging “stepping stone” environments using the DART simulator

CLUBS AND ACTIVITIES

Husky Robotics Club, U. of Washington Seattle, WA
Software Subsystem Lead January 2020 - present

- Write software for teleoperation and autonomous control of a student-designed and -built Mars rover
- Delegate tasks to maximize our team’s chances of winning the University Rover Challenge

- Recruit software team members by writing an application form and reviewing responses
- Prepare the software portions of official competition essay and video submissions
- Coordinate with hardware and electrical subsystem leads to mount sensors and motor boards
- Implemented a planar navigation simulator with A* search, and inverse kinematics for the rover arm

PERSONAL PROJECTS

https://github.com/nhatch/slam	Factor graph SLAM implemented from scratch
https://github.com/nhatch/rrt	RRT motion planning implemented from scratch
https://github.com/nhatch/ilqr	Iterative LQR control implemented from scratch
https://github.com/nhatch/mcts	A (pretty good) AI for Mancala using Monte Carlo tree search
https://github.com/nhatch/mnist	Multilayer perceptron for MNIST digit recognition from scratch

WORK EXPERIENCE

eSpark Learning Chicago, IL
Full-stack software engineer June 2014 - July 2017

- Led the annual iOS app release, removing 300ms tap delay and rewriting the video uploader
- Increased sales pipeline by 25% by integrating our product with Airwatch
- Improved academic fidelity metric from 80% to 87% by refining our app deployment system
- Implemented Apple's "Device Assignment" protocol, making our MDM first-to-market (solo project)
- Conducted ~20 interviews and code challenge reviews for recruiting

Dept. Computer Science, University of Chicago Chicago, IL
chiTCP developer October 2013 - June 2014

- Implemented a TCP-over-TCP daemon for use in Borja Sotomayor's networks class

Mission Street Manufacturing Santa Barbara, CA
Software intern June - August 2013

- Developed prototype front- and back-end software for consumer-friendly 3D printing

CLASS PROJECTS

A. Fishman, N. Hatch, and Y. Yang. *Navigating Holiday Traffic*. CSE 599 Reinforcement Learning; Autumn 2020.

Paper: https://nhatch.github.io/files/Navigating_Holiday_Traffic.pdf

Slides: <https://docs.google.com/presentation/d/14OqVKhnbL5BtnwXD-2FRr80QebtkZjkICApYpljAoGg>

N. Hatch, G. Parpart, D. Starikov. *Deep Robot Localization*. CSE 571 AI-Based Mobile Robotics; Spring 2020.

Paper: <https://nhatch.github.io/files/Deep-Robot-Localization.pdf>

Slides: <https://docs.google.com/presentation/d/1KFFPJaoL5LctJbqo79rDn1qVgsLjKHGr5tkprjcoeVQ>

A. Baughan, N. Hatch, V. Raganeni, and B. Yang. *Search-Based Testing for Robotic Motion Planning Algorithms*. CSE 503 Software Engineering; Winter 2020.

Paper: https://nhatch.github.io/files/Search_Based_Testing.pdf

Slides: <https://docs.google.com/presentation/d/1ER0XtU6asJ3MKk-b1D7mIUPU-lZa2kUanL-SIbILsW0>

S. Foley, N. Hatch, and A. Beedu. *A Global Optimal Solution to Non-Minimal Relative Pose Estimation*. ECE 8823 Convex Optimization; Spring 2019.

PDF: <https://nhatch.github.io/files/FoleyHatchBeeduNotes.pdf>

N. Hatch and E. Wijmans. *Probabilistic Graphical Modeling of Data-Dependent Annotator Accuracy for Active Learning*. CS 8803 Probabilistic Graphical Models; Spring 2018.

Paper: https://nhatch.github.io/files/Hatch_Wijmans_final_report.pdf

Slides: https://nhatch.github.io/files/Hatch_Wijmans_presentation_slides.v2.pdf

N. Hatch, A. Sundaresan, M. Dutreix, R. Kuppan, and P. Pattanashetty. *Google Landmark Recognition and Retrieval Challenges*. ECE 6254 Statistical Machine Learning; Spring 2018.

Paper: https://nhatch.github.io/files/landmarks_report.pdf

Poster: https://nhatch.github.io/files/landmarks_poster.pdf

N. Hatch. *Unsupervised Curriculum Learning for Image Clustering*. CS 7643 Deep Learning; Fall 2017.

Poster: <https://nhatch.github.io/files/image-clustering.pdf>

Other graduate-level classes (exam-based): Computer Vision, Linear Systems, Theoretical Statistics, Machine Learning Theory, Mathematical Foundations of Machine Learning

AWARDS AND HONORS

Georgia Institute of Technology, Presidential Fellowship	2017 - 2019
University of Chicago, Dean's List	2010 - 2014
University of Chicago, University Scholarship	2010 - 2014
University of Chicago, National Merit Scholarship	2010 - 2014
University of Chicago, Student Marshal	2013
Phi Beta Kappa	2013
University of Chicago, Fulton Prize for Orchestral Excellence	2012

TEACHING EXPERIENCE

Dept. Computer Science and Engineering, U. of Washington	Seattle, WA
Head Teaching Assistant, undergraduate machine learning	Winter 2021

- Held weekly recitations, wrote and graded homeworks, and managed 10 TAs for a class of 150 students
- Dealt with academic misconduct investigations for a dozen students

College of Computing, Georgia Tech	Atlanta, GA
Teaching Assistant, undergraduate machine learning	Fall 2019

- Graded homework, held weekly office hours, answered Piazza questions, and wrote the final project

Insight Tutoring	Chicago, IL
Volunteer tutor	January 2015 - May 2017

- Reviewed homework and class material for three economically disadvantaged sixth-grade students
- Periodically revisited old material for spaced retrieval practice

Dept. Computer Science, U. of Chicago	Chicago, IL
Homework grader, graduate discrete mathematics	October - December 2012

- Graded twice-weekly problem sets for Laszlo Babai's graduate-level class

Dept. Mathematics, U. of Chicago	Chicago, IL
SESAME Teaching Assistant	July 2012

- Assisted teaching a class for middle school math teachers on "problem-based learning"

Dept. Mathematics, U. of Chicago	Chicago, IL
Young Scholars Program Counselor	June - July 2012

- Tutored four 9th/10th-grade math students in an advanced summer math program

- Assisted teaching a class in basic computer programming
- Gave weekly reports on student progress, including helping to write a diagnostic exam

PROFESSIONAL SERVICE

Dept. Computer Science and Engineering, U. of Washington
Organizer for New Grad Orientation

Seattle, WA
 Fall 2020

- With two co-organizers, planned two days of orientation activities for new CSE PhD students
- Updated last year's orientation materials to a virtual format due to the COVID-19 pandemic
- Coordinated faculty course pitches, logistical information, and a scavenger hunt

Georgia Tech Machine Learning (ML@GT)
Co-creator of Machine Learning Student Seminar

Atlanta, GA
 Fall 2019

- With one co-organizer, started a new seminar with eight presentations to a 25-student audience
- Invited presenters, including five faculty lightning talks
- Organized catering, room reservations, and publicity

TECHNICAL STRENGTHS

Programming Languages	Python, C++, Javascript/HTML/CSS, Ruby
Robotics and Simulation Software	ROS, Gazebo, DART
Deep Learning Frameworks	PyTorch, TensorFlow
Tools	Git, Vim, LaTeX
Foreign Languages	Spanish

HOBBIES

Places visited	Spain, United Kingdom, Japan, Argentina, Brazil, Taiwan, Hong Kong, Singapore, China, Peru, South Africa, Namibia, Botswana, Zimbabwe, Turkey
Other interests	viola performance, rock climbing, go (the board game)
